BRIEF PROFILE

TL-Services (TechLine-Services) is dedicated to helping consultants, laboratories and manufacturers obtain the required governmental approvals for commercializing their Telecom, Wireless, and Radio Frequency equipment in Africa, South America, and the Caribbean.

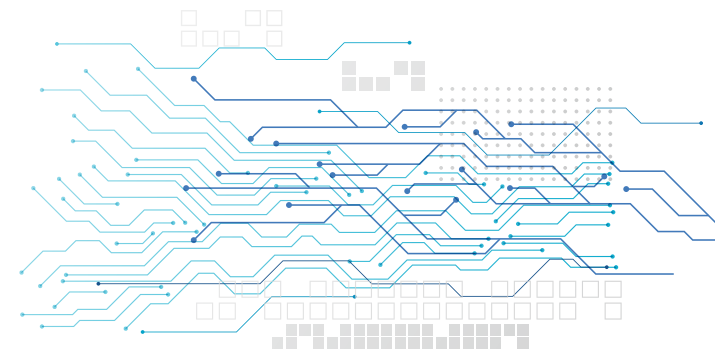

TL-Services is well experienced in this Type Approval field and we have contacts with regulatory agencies and local partners in each country that we cover.

If you are interested in one or more countries around the world, TL-Services uses an integrated and personalized service approach to meet your needs.

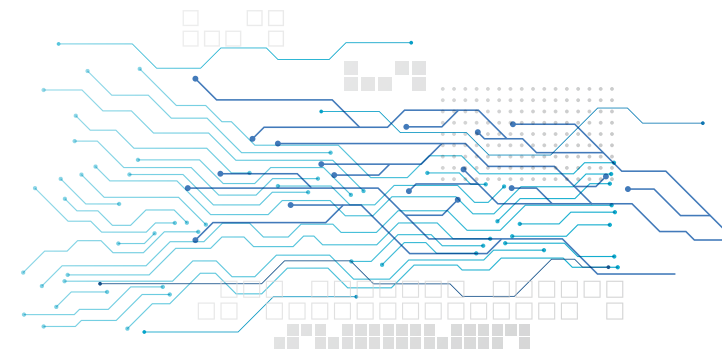

TL-Services provides a complete compliance service for many telecommunication equipments such as : radio/wireless/safety and electromagnetic compatibility (EMC), etc.

Our vast network of regulatory agencies also plays a role of updating us on information related to the regulation process.

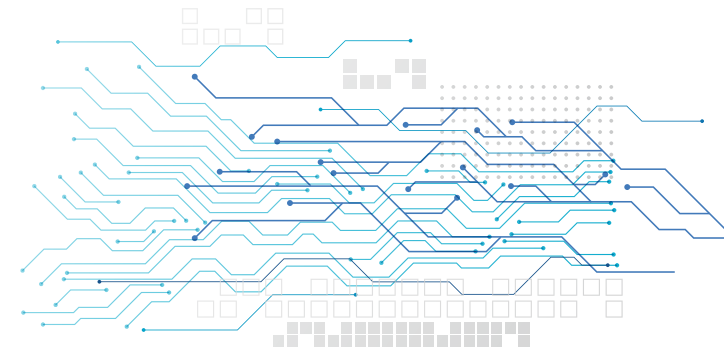

With a good quality service, the organization has helped many international manufacturers, laboratories, suppliers and other consultants to obtain their certificates much easier.

For many years, TL-SERVICES has had excellent relationships with telecom regulators in making the certification process as fast as possible. We fully master the techniques and the procedure of the regulation of each country that we cover.

TL-Services is a dedicated group of professionals who are experienced in the certification of telecommunication equipments.

TL-SERVICES has a proven track record in obtaining type approval certification for a diverse range of telecommunication products such as ATM and frame relay access devices, optical, DSL and PSTN modems, RF communication devices, Bluetooth BT, Wireless and components such as RFID, SRD, etc.
